

The figure consists of two side-by-side scatter plots. The x-axis for both plots is 'normalized enrichment score', ranging from -2 to 2. The y-axis represents the rank of genes, with 1 at the bottom and 20 at the top.

The left plot, titled 'ranked by Wald stat', shows blue solid circles. The scores are generally lower (more negative) for higher ranks, starting around -2.5 at rank 1 and increasing to about -1.5 at rank 20.

The right plot, titled 'ranked by shrunk LFC (planned)', shows red open circles. The scores are generally higher (more positive) for higher ranks, starting around -1.8 at rank 1 and increasing to about 1.8 at rank 20.
